

ReconciliationWizard® System Requirements

1. Stand Alone* Installation (Client, Database and Service installed in one PC)

- Microsoft® Windows XP SP3¹ or higher
- Pentium IV or later
- 1Gb RAM or higher
- Hard Disk with at least 12 Gb free
- Internet Connection

Stand Alone installations can be expanded to multi-user configurations in small enterprise environments (See ReconciliationWizard® Deployment Scenarios guide).

2. Multi-user installation (Client installed in remote computers, Microsoft® SQL Server installed in a Backend Server, Scheduling Service installed in a Business Tier server.)

- Backend (Database) : Microsoft® SQL Server 2008 R2 Standard Edition or higher
- Scheduling Service: Microsoft® Windows XP SP3 or higher
- Client Computers: same requirements as Stand Alone installation

Note: Multi-user installations will require proper Authorization levels for client computers to access Database Server and Scheduling Service

* Can be expanded to multi-user in small enterprise environments
